AXMEDIS Editor Crack [Win/Mac]

The KEYMACRO module is an additional module of the AXMEDIS system. It allows to assign special forms to the fields of the AXMEDIS Objects. The key macro module can be used to assign forms to the fields of an AXMEDIS Object. The user can use macros for the creation of forms for the fields of the AXMEDIS Object or for the creation of forms in databases. You can add your own macros or you can use existing macros from the key macro library. The user can use the macro editor to create, rename and delete macros, and to edit the properties of the macros. KEYMACRO Description: The KEYMACRO module is an additional module of the AXMEDIS system. It allows to assign special forms to the fields of the AXMEDIS Objects. The key macro module can be used to assign forms to the fields of an AXMEDIS Object.
