If you're having trouble installing an update, try running the Windows Update Automatic Troubleshooter, which can fix some common update problems, can also help: select Start.

-4 means you have a connection problem. Not all users can use this Windows Update program. The Windows 10 update can be installed on a computer with the software installed, but only after a reboot. If you have questions, ask them on our forum. If your Windows 10 update

does not start, then this is easily solved. Sometimes in a Windows system, when you run an update, failures may occur. The reasons for the failure are different, but the essence is the same - the upgrade to Windows 10 cannot be downloaded or completed.
