### User-Agent Switcher For Chrome Crack + For Windows [Latest-2022]

User-Agent Switcher for Chrome is a lightweight Chrome extension built specifically for helping you switch between user-defined strings and set up custom URLs that you want to be spoofed. User-Agent Switcher for Chrome lets you change Chrome's default user agent for spoofing other devices and/or web browsers. A user agent, which represents a small text description of your device, can be detected by websites via the requests that are sent while navigating on the Internet. It provides support for toolbar integration, so you can easily access its features. Additionally, you are allowed to enable or disable the tool from Chrome's Extensions panel. The extension comes packed with many configuration settings which give you the possibility to specify a new user-agent name, string, and group, choose the default user-agent string, create a list with permanent spoofed URLs, and import data from XML files. Since it doesn't require much computer knowledge to set up the dedicated parameters, even rookies can master the entire process with just a few clicks. During our testing we have noticed that User-Agent Switcher for Chrome carries out a task very quickly, and no errors showed up throughout the entire process. It doesn't eat up a lot of CPU and memory, so the overall performance of the computer is not hampered. As a conclusion, User-Agent Switcher for Chrome proves to be a reliable Chrome add-on that comes bundled with a powerful pack of tools. It can be easily installed and configured by all types of users, regardless of their experience level.
