---

close the application press the 'Exit' button. - To sort the list press the 'Sort' button and the list will be re-sorted. - Press the 'Search' button and scan the WEB page will be started again. - To set an HTML bookmark press the 'Bookmark' button. - To send an e-mail press the 'E-mail' button and the address will be written into a text-file. - To save the HTML or XML file press the 'File' button. - To copy a selected item to the clipboard press the 'Copy' button. - To browse for a file to open press the 'Open' button and browse to the file. - To close the browser press the 'Close' button. - To delete a item press the 'Delete' button.

---

Downloading files and documents from WEB will be as easy as it's was Your local harddisk. No more pop-up screens, and false(junk) links. . CREATE A NEW WEB PAGE, add HTML code, and paste the URL into the URL field of this nifty little HTML editor. The software will scan your WEB page for HTML code. If a title is found then it will be added to the list as a title. Then it will add the code as an HTML. The HTML code may be viewed by pressing the 'Preview' button. The HTML can be edited in the editor by pressing the 'Edit' button. The HTML editor has a built-in JPG viewer that makes it easy to view and modify JPG

---

images. It also has font selection and allows you to choose the fonts that you wish to use. In the editor the HTML is saved automatically. You can 'Email' the edited HTML. You can 'Delete' the HTML from the editor or 'Save' it to a file on your computer. If you want to scan a WEB page for JPG files then you will need to 'Load' the WEB page. There are plenty of options in this free HTML editor. If 81e310abbf

Simple, easy-to-use, free download manager. Extract files from WEB, FTP, local and network drives, get web pages into a new tab in your browser and many more features... More Info: If you want to download many files from a WEB, then this is probably the easiest way to do it.
