blancco 5 crackBy the time the snow gets here, I want to be DEAD! LOL I saw pictures of the storm this morning and its supposed to be about a foot or more. Its going to be fun for sure. I wish I was there right now. It will be all snow men and learning to swim when I get back. I am going to look at a hunting spot that I had my eye on so I hope to get into it.I also like to play golf, so snow and a winter storm here are just perfect. I am going to watch the weather and see what I can get away with.

Nucleophosmin-anaplastic lymphoma kinase (ALK) fusion mediates an oncogenic pathway distinct from ALK itself. Anaplastic lymphoma kinase (ALK) fusions have been described in solid tumors, where they are mostly oncogenic. ALK

fusions have also been identified in hematologic malignancies, and more recently, in pediatric solid tumors. ALK fusions, initially described in non-small-cell lung cancer (NSCLC) and in anaplastic large cell lymphoma (ALCL), were reported in 3% of adult patients with lymphomas, in 2% of patients with neuroblastoma, and in 0.4% of patients with diffuse large B-cell lymphoma. In this study, we searched for fusion partners of ALK in a cohort of 1074 malignant lymphoma cases and identified ALK fusions in 12 cases. In 9 cases, ALK partners were described in the literature, notably T cell receptor beta (TCRbeta) gene fusions in CD4+ T cell lymphomas and rearrangements of the nibrin gene in ALK-positive adult T-cell leukemia/lymphoma. In one patient with a novel ALK fusion partner identified by RNA in situ hybridization, ALK fused to nucleophosmin (NPM), a well-known tumor suppressor located in the nucleolus. NPM-ALK is an

oncogenic fusion protein with a nucleolar and nucleoplasmic localization. This immunohistochemical and RT-

Blanco .Q: How do I get the effect of changing the value of a class property in javascript? Say that I have an object like this `var obj = { a: 12, b: 13 }`; How can I change the value of a to be an array of "b" and then change the value of b to be an array of "a"?

Any ideas? A: You can do this with an object mapping: `var obj = { a: 12, b: 13, as: [], bs: [] }
obj.as[0] = obj.b; obj.bs[0] = obj.a;` Or you can use a map or a for loop: `var obj = { a: 12, b: 13 };
var newObj = {};
for (var i in obj) {`
