Cabletech KPO3431 The KPO3431 Cabletech USB to Serial adapter is just that - a USB to Serial adapter. It requires no drivers to setup and is capable of USB/RS232 data conversions when attached to a computer or directly to a COM port on a RS232 interface card. The USB to Serial cable attaches to a computer's USB port and can be used to link a PC to a Microchip PIC microcontroller or another embedded device. There is no need for a header on the embedded circuit board and the USB cable eliminates the need for an additional SPI port. This USB to Serial converter is supplied with a USB cable and USB to Serial converter. An XLR-to-RS232 cable is also included which is not necessary but is a nice added option. Designed specifically for PIC microcontroller and MCS-51 based systems, the USB to Serial converter can also be used with a variety of microcontrollers and I/O expansion cards. The USB to Serial converter comes with an instruction manual and is identified as a USB Serial Converter. The Cabletech KPO3431 USB to Serial adapter is available in a 2-port or 4-port model and each unit can be configured for either RS232 or RS422 function. The Cabletech KPO3431 USB to Serial adapter is controlled by an easy to use menu system and has RS232 line drivers. RS232 characteristics include: RS232 level, RS232 compatible data rate, no parity, and no inverted 5-bit data. The RS232 compatible data rate allows for the RS232 to RS485 data path to be operational for RS232 and RS485 devices. The Cabletech KPO3431 USB to Serial adapter uses the USB High Speed (480 mbps) USB interface for data transfers.

Q: What were the parameters of the Space Shuttle Endeavour's first drop test? We know from all the success of the Space Shuttle Endeavour's first drop test that this test was a success. We also know (at least from what I read) that one of the two parachutes failed due to problems with one of the main chutes' "parachute fairing" (someone correct me if I'm wrong). I can't find a reference that indicates what the parameters of the first

---

drop test were, or if the failures were just a result of being in a thermal environment or if
