The Lite version has just a few settings to choose from, so the user can make sure to get the most out of the instruments range. MultiGain VST plugin has four chain effects with individual gain control and can save settings to a user defined hot-key. Each effect can be set up with independent gain settings while "MasterGain" is getting a linear curve. Robots Get Their Booty - And People's Pants For the professionals, we knew this day was coming. We read about it in news stories, we heard it from the companies we talked to, and we really knew it was coming. Although we have been preparing, we still aren't quite ready for it to arrive in the form of a giant metal robot clad in limbless body armor and armed with a briefcase full of cash. In 2015, the world of gadgets got a lot sexier. Electronics became a whole lot more human, and not just in the way that Barbie, clothed in the gold of plenty, can become. This year, we saw giants like Apple and Google enter the robot fray, joining the likes of robotics giants like Boston Dynamics and Astro Teller's Schaft, as well as startups including Aldebaran Robotics and Rethink Robotics. Last year, I wrote about futurist Dr. Nicholas "Nick" Sarracino's talk about advanced humanoid robots and how the use of robotics in manufacturing was just around the corner. You can read his history of robotics, in which he sees humans finally merging with machines, in full here. This year, Sarracino, along with technology critic and futurist Jaron Lanier, wrote a book, "Who Controls the Robots?" (Amazon) for those who would like to know more about our latest technological transformation. [embedded content] The book focuses on the intelligence and interactivity of robots, and how the computer-generated humans who receive our data-streamed services (Facebook, Netflix) will increasingly be relegated to the background, aside from their human-created entertainment products. Sarracino and Lanier cover the history of robotics, and how many of today's robotic inventions have evolved from technologies created more than 50 years
