We will be adding new web fonts every week.Expression of human heat shock protein 70 in zebrafish as a reference gene for evaluation of toxicity of organic pollutants. Water pollution is a serious problem worldwide, especially in developing countries. The estimation of the effects of organic pollutants requires a reference gene that can be used for detection of toxic effects in aquatic organisms. In this study, a constant expression of human heat shock protein 70 (hsp70) in zebrafish was investigated as a reference gene for the evaluation of toxicity of six organohalogen compounds, including hexachlorocyclohexane (H
