The special edition of the Hyperventila game is a "transmedia" digital adventure, which is designed to support the project through a completely new approach to the creation of visual and aural atmospheres and the integration of human experience. The special edition comes with a new point-and-click graphical adventure game, which is based on the concept of interactive art. The game, with its high-end graphics and the use of sound, is highly innovative in its visual presentation. The Eureka noctis adventure is the first Point and Click game from the Czech region, which is targeted primarily at the gaming industry. As with all games of the Hyperventila series, the special edition includes three mysteries. The mysteries are based on the three main characters of the Hyperventila universe: the psychopathiac Elan Du Stag and the two victims who died in the course of the B-movie production: Alabaster and Reena. Each main character has its own sub-mystery. The three mysteries are based on deep philosophical questions that were formulated by Jan Marek. As a result, the mystery themes are reflected in the game. The puzzles are a mixture of hidden object and "select-and-activate", as well as logic and reaction. In addition, the user can complete tasks, to gain information and solve mysteries. The game also integrates the manipulation of objects and dialogues, which include detailed information on the novel. Furthermore, the user can draw on a virtual painting to solve puzzles. The game has a unique interactive narrator. It is an unexpected new approach for the Hyperventila universe. The narrator's voice is presented on top of the narrated dialogues. The narrator, whose speech is recorded and processed by professional actors, can actively influence the player's game experience. Game Description: In the Hyperventila game, you take on the role of an ordinary citizen who discovers the secret of the Hyperventila project and a cult that lives on the other side of the door. The developer of the Hyperventila series, which started with a classic point-and-click adventure game, has received a large number of important awards. Key Features: High quality graphics and game play in a new visual interactive art style New enigma including scientific and historical background: Hundreds of messages and electronic paper are hidden in the game.
