The Story of the Elden Ring Through the grandeur of the Lands Between and the power of the Elden Ring, adventurers with force have been seen for generations. In the myth, when a dragon and a human were locked in a fierce battle, a holy knight appeared out of nowhere with a mystical object and intervened. Upon hearing of the fight, the dragon's attack was stopped and he swooned and fell to the ground. With a bold and powerful leap, the knight snatched the holy object and vanished. Chosen to be a hero, the dragon's last wish was to meet a king who is worthy of the sacred object. The knight could not accept it. Ever since, the knight has protected the object, refusing to hand it over and performing austerities to strengthen his abilities. However, when the dragon passed away, no new dragon arrived for 700 years. In the time that has passed, the sacred object lay lost, and a curse came over the dragon's name. In the following 700 years, an era of peace in the Lands Between began. Meanwhile, in the human realm, the skill of orcs was developing. There was no hope for the future of the human realm in the darkness that was the past. In the lands between, the human and the orc were immersed in a state of war. And, as the war finally ended, the land rose to prosperity. The land was covered with greenness, there were bustling cities and fortresses built on the fertile fields. The dragon, who was once a hero, was forgotten as a legend by then. However, the glory of the human realm was short lived, for the king whose sword put down the evil of the orcs was assassinated. At that time, a band of rogues appeared. They attacked the king's army, slew the leader, and assumed control of the kingdom. After some time, the kingdom fell into chaos and there were no longer any civil guards. Aged man with a sorrowful brow, the king's assassin swore the oath to take vengeance for his former king. With a freshly-burned corpse, he swooned. With the king's blood still burning, the assassin took the holy object from his waist and used it to turn into a dragon. Somehow, from out of nowhere, adventurers who were aiming to challenge the assassin came in the land between. They survived a fierce battle and a spell that even

As said earlier, in the game, the first line of action is selecting the character's class, and you can freely change the class of the character throughout the game. There are the following classes to choose from. ■Warrior-Class A strong and dominant class with a sword as a main weapon. While basic, this class can swing its sword to combat monsters. Compared to other classes, its intelligence is lower, and it has a smaller mana pool, but its attack power and endurance are higher than those of other classes. ■Magic-Class A class that uses magic and can perform various combos based on the level of magic known. A lesser class than the Warrior class, it can use high level magic that requires its concentration, but it also has weaker offensive capability. Compared to the previous game, the Wizards are now divided into three types. There are those with high-level magic, those with medium level magic, and those with low level magic. They have the same basic spell list that can be added and removed. ■Ninja-Class A class that has the art of concealment and invisibility as its mainstay. As such, it can use unseen attacks, giving it the potential to defeat enemies that are weaker than it in physical attack power. With an extreme precision that surpasses that of the Mage, it can attack from a distance while avoiding attacks. Compared to the previous game, the Ninja is a less dominant class, but it is a class that can fully utilize its dexterity. ■Sage-Class A class that masters skills in high-level magic spells and has the ability to survive even without mana. It can perform high-level spells with ease and amazing speed. Compared to the previous game, the Mage class is no longer divided into three types, and can use all level-up magic at the same level. ■Dark-Class A class that is the most powerful of the four, able to wield the power of the Dark. It can use defensive magic and increase its defense power. Its fire-based attack allows it to deal mighty blows that can easily burn the field or wipe out every monster on the map. Compared to the previous game, Dark-Class is divided into two types. There are those who can use offensive magic and those who can use defensive magic. ■Berserker-Class A class for those who wish to do overwhelming damage. While it is inferior to the Dark-Class in terms of abilities, its attack
