Landscape Architects, and Contractors AutoCAD Architecture Highlights A.DWG (.DWG) drawing is the native file format used by AutoCAD. It is a vector-based format, meaning it can be scaled up and down without loss of quality. This makes it ideal for drafting very large designs. The current version of AutoCAD (2017) allows the creation of .DWG drawings at a resolution of up to 1 million points. View the AutoCAD Architecture eBook, a free educational resource. KeyDiplomacy has always been known as an art of the silent treatment. If you're able to give your opponent the cold shoulder, and avoid any kind of physical contact, there's a good chance you're doing it right. But in today's globalized world, some countries are starting to question if this kind of strategy is still a good way to approach diplomacy. Other nations are now starting to do it just as badly. A recent spat between India and Pakistan is just the latest example. India and Pakistan have long been at odds with

---

each other. There are four reasons why. India and Pakistan have a bloody history. The two countries have been at each other's throats for decades. In 1947, when the British left the Indian subcontinent, it saw the creation of two states: India and Pakistan. These states were both dominated by Muslims, and each other. They both had different languages, cultures, and religions. The country that is now Pakistan was carved out by the Muslim Quaid e Azam, Muhammad Ali Jinnah, who decided to create the country with the consent of the majority of the Muslim population. Jinnah and the other leaders of the Muslim League

---

wanted to create a Pakistan for Muslim to live in without any worries. This meant that there would be no Hindus, Buddhists, or Christians. All Muslims would be the same. The country's capital, Islamabad, was built on Islam. The national flag, the national anthem, and the national motto of Pakistan all are in the name of Islam. ca3bfb1094

1. Field of the Invention  
The present invention relates to a polyamide resin composition superior in moldability, mechanical properties and heat resistance.

2. Description of the Prior Art  
Polyamide resin compositions are widely used as molding materials such as injection molding materials, injection-molded articles, electrical insulators, industrial tapes, etc. Because of high moldability and mechanical properties, polyamide resin compositions have heretofore been used as injection molding materials, injection-molded articles, electrical insulators, etc. However,

---

they are not as durable as polypropylene resin compositions. Accordingly, it is required to improve the heat resistance of the polyamide resin compositions. The use of the organic phosphite, for example, to improve the heat resistance of polyamide resin compositions is proposed (Japanese Patent Laid-Open Nos. 100766/1985, 105728/1986, etc.). When the organic phosphite is added to

Q: Why do these two strings not match? I am using Java and IntelliJ.

```
public class mycode { public static void main(String[] args) { String input = "This"; String value = "This"; if (input.equals(value)) { System.out.println("TEST"); } else { System.out.println("NOT TEST"); } }
```

---

} When I run it I get: NOT TEST Why doesn't the if statement work as I expect it to? A: Because the default value for String is to be equal to itself. Try "This".equals(value) instead.
