if you own a microphone, you might have an old tascam portastudio that is collecting dust. in this lesson, set up an audio midi setup and use an outboard sound card. learn how to connect a vst plugin to a tascam portastudio with audio midi setup. most of the time, i hear questions like: "how long can i use this sample? or "what is the best library for this purpose?" i have recently realized that is not the case: there are many open-source and commercial libraries, as well as different manufacturers. you can use any library or plugin for as long as you want, as long as you work with it constantly, and as long as you update it on a regular basis. thats why i selected these 10 libraries in the following order:- *best price for a 12 month license. *- large library with diverse genres.- *best quality for a 12 month license. *- many different instruments, various sounds.- *best price for a 30 day license. *- high quality, huge sound libraries.- *best quality for a 30 day license. *- nice collection of different instruments. some of them are missing, however.- *best price for a 6 month license. *- useful for beginners to expand their musical creativity.- *best quality for a 6 month license. *- a lot of new, unreleased stuff.- *best price for a 1 month license. *- only a few instruments.- *best quality for a 1 month license. *- a lot of good instruments, but sound quality is not as good as the others. we will continue collecting the most useful libraries for you here, and we will try to create a procedural string library which will include random, random and procedural loops, and random and procedural arpeggios.
