The story of a lost expedition to the centre of the Earth by an alchemist or scientist in the 16th century; a scientist who will name his expedition after the lost city of Troy. And will find that he has no business being there, but will keep going, just for the adventure of it. The story of a lost expedition to the centre of the Earth by an alchemist or scientist in the 16th century, who will find that he is on a fool's errand when he gets there and will keep going, just for the adventure of it. It is a story about a 12th-century alchemist named Arne Saknussemm, a Polish nobleman who is driven to find an elixir of life, and who is driven to be driven by a complete lack of belief in his journey. The Journey to the Center of the Earth is a classic 1864 science fiction novel by Jules Verne. The story involves a German professor (Otto Lidenbrock in the original French, Professor Von Hardwigg in the most common English translation) who believes there are volcanic tubes going toward the center of the Earth. He, his nephew Axel (Harry), and their guide Hans encounter many adventures, including prehistoric animals and natural hazards, eventually coming to the surface again in southern Italy. In the introduction to the Oxford Classics edition of Journey to the Center of the Earth, scholar William Butcher articulates why he believes that the novel is so thrilling: The mood is light-hearted although hardly optimistic, for it contains tragic, obsessive, and sometimes morbid elements. There is even a love-element, of sorts. In this novel, more than elsewhere, Verne seems to let himself go, while at the same time drawing inspiration from many different sources. He adds that the novel is unusual in its degree of escape from contemporary (and indeed historical) reality. Verne is here in his element. He delights in the feel of subterranean existence, with imagination, even dreams, playing an important role. His writing is volcanic.

One of these rooms is quite cool and Axel falls asleep, wondering what time it is. Suddenly, he finds himself in a room full of rocky crystal blocks. His eyes keep going from the peaks to the edges of the blocks. When he lies down on one of the blocks, he realizes that he has fallen asleep. At this point, he becomes terribly dizzy and loses consciousness. On the edge of the blocks, he looks down and through the crystal walls he can see the earth, the sky, and the waves of the sea. Let there be peace on earth. For it is written on the Book of Life. The time is fulfilled. And the End of all things is at hand. And just as it was in the beginning is now. Again it is just as the father saw it is here before him. And so shall it be forever more. The Lord is doin' it. The Chariot is come. The Lord's gonna do what he said he's gonna do. "Yessir and Amen!" Within another hour, the first thing Lidenbrock saw, after the storm had passed, was the dome-shaped opening in the mountain. It was now clear that it was not formed of any stone or metal, because the enormous weight above had pulled the earth to a new level. The breach in the dome indicated that it had been made by powerful forces, forces that could only come from somewhere else. A feeling of vast peace and security, which were unlike anything he had known before, filled Lidenbrock's heart. He felt no fear, although he knew that only too well the monsters, which fed upon dead bodies, would like nothing better than to fall upon them. But to this day he does not know what happened to them, whether they all came down through the hole, or whether they vanished as suddenly as they had come. 5ec8ef588b
